KlinMak[®]

keep clean

KilloPro: disinfect fast and without wetting. Always!

KilloPro is an ideal professional device, always ready for use, for very **fine, uniform spraying** of disinfectant products on every surface where the “impalpable” supply is particularly necessary, extending the field of use of Killo to new applications (e.g., textile surfaces such as mattresses, curtains, sofas, armchairs or various equipment, etc.) as well as traditional applications (glass, windows, bathrooms, furniture, tables, doors, windows, shutters, floors, etc.).

KILLO[®]

PRO

DISINFECTING MACHINE

Description

Power indicator

Triple spraying nozzle

Charger with cable

USBplug

Power Switch

Tank 1L with water level indicator

Main technical specifications

Description	Killo Pro
Part Number	F.641.0
Lithium battery	2000 mAh
Charger	5V 1A (included)
Charging time	5 h with maximum charge
Treated surface	400 sqm/tank
Runtime	4h
Charger indicator	yes
Tank	1 L
Water level indicator	yes
Atomization	20µm
Water flow	50 ml/min
Atomization distance	from 20 to 40 cm
Materials	ABS - HDPE (polyethylene)
Dimension spray	15 x 13 x 15 cm
Packaging	single
Box	18 pieces
Dimension Packaging	48 x 42 x 34 cm
Weight single piece w/ packaging	0.45 kg
Weight package	8.1 kg

Instructions

1. Do not dismantle the product.
2. Make sure the input voltage is the same as the product described.
3. Do not soak the product in water or run under water.
4. Do not use the product with any type of viscous liquid (such as paint) for spraying, to avoid damaging the product.
5. Do not place the product near heat sources to avoid damage.
6. Do not use the product when charging; avoid water at USB charging station.
7. Do not place product upside down when water is filled to avoid water leaking into spraying head.

Friendly Reminder

Warning

1. For the first use, please make sure to charge the battery fully using the original manufacture charger.
2. If the product is used to spray disinfectant products and pesticides be sure to clean the product thoroughly. Do not use strong corrosive liquid in the product.
3. If the product is not being used for a long period of time .
4. Please charge the product every two months to keep the battery lifetime.
5. The product is equipped with high precision pump and battery.
6. Do not turn on the power without any liquid inside as it will cause deformation of the product.
